

SNEHA SHARMA

FRONTEND ENGINEER | REACT | NEXT.JS | UI SYSTEMS

India | sharmasneha2546@gmail.com | LinkedIn | GitHub | Portfolio

SUMMARY

Frontend Engineer with 3.5+ years of experience building scalable, high-performance web applications using React, Next.js, and TypeScript. Specialized in dashboard-heavy systems, role-based architectures, and workflow-driven platforms across fintech, government, and SaaS domains. Strong in designing clean, maintainable UI systems with modern frontend practices, state management, and API integrations. Focused on performance optimization, accessibility (a11y), and delivering real-world product impact.

WORK EXPERIENCE

Frontend Engineer - Settlemint India Pvt. Ltd.

Jan 2023 - Present

- Built production-grade frontend applications across fintech, government, and SaaS platforms
 - Developed dashboard-heavy interfaces with complex workflows and role-based access systems
 - Designed scalable and reusable component architectures using React and Next.js
 - Implemented REST API integrations and handled real-time data workflows
 - Optimized UI performance, improving load time and interaction responsiveness
 - Collaborated with backend and product teams in Agile environments
 - Focused on usability, accessibility (a11y), and real-world problem solving
 - Leveraged AI-assisted tools to improve development speed and debugging efficiency
-

KEY PROJECTS — SETTLEMINT INDIA PVT. LTD.

AI Face Recognition Attendance Platform

- Built frontend for an AI-powered attendance and workforce management system
- Designed multi-role dashboards (Super Admin, Admin, Organization, Employee)
- Implemented secure authentication flows and real-time monitoring interfaces
- Structured scalable UI architecture for enterprise workflows

Tokenized Asset Platform (Fintech)

- Developed issuer and investor dashboards for a fintech asset tokenization platform
- Built workflows for onboarding, asset operations, and portfolio tracking
- Designed data-heavy interfaces with structured UI for transaction systems

Jharkhand Fisheries Portal (Government)

- Developed frontend for a government workflow portal
 - Implemented multi-role dashboards and scheme-based application flows
 - Built interfaces for supply-chain tracking and administrative workflows
-

PROJECTS (PERSONAL & CLIENT WORK)

Fighter Portfolio (Client Project)

Portfolio + lightweight CMS (admin-controlled)

- Designed and developed a real-world portfolio platform for a professional fighter
- Built an admin panel (/admin) allowing content updates without code changes
- Implemented structured UI for managing profile, achievements, and media
- Focused on performance, responsiveness, and real-world usability
- Live: <https://desert-devil-mma.vercel.app/>

AI Resume Architect (Personal Project)

- Built an AI-powered resume builder to generate and optimize resumes
- Designed clean UI for structured resume creation and customization
- Focused on usability and modern UI patterns for better user experience
- Live: <https://ai-resume-architect-sand.vercel.app/>

FitNova (Personal Project)

- Developed animated fitness SaaS interface with dashboards and user flows
- Focused on engaging UI and smooth animations

CivicEase (Personal Project)

- Redesigned government services platform with accessibility and mobile-first approach
- Built guided application flows and citizen dashboards

Freelancer CRM (Personal Project)

- Designed SaaS-style dashboard to manage clients, projects, invoices, and payments
- Built scalable UI with clean architecture and modern UX patterns

SKILLS

- **Frontend:** HTML, CSS, JavaScript, TypeScript, React, Next.js
- **State Management:** Context API
- **Styling & UI:** Tailwind CSS, Responsive Design, UI Systems, Accessibility (a11y)
- **API & Data:** REST API Integration
- **Tools & Workflow:** Git, GitHub, Figma, Debugging, CI/CD (basic), Vite
- **Other:** UI Architecture, Performance Optimization, Agile/Scrum, AI-assisted Development

EDUCATION

Bachelor's of Engineering (Electrical Engineering)

2018 - 2022

Gujarat Technological University

ADDITIONAL INFORMATION

- Experience building real-world applications across fintech, government, SaaS, and AI domains
- Strong focus on scalable frontend architecture and performance optimization
- Skilled in developing dashboard-heavy systems and workflow-driven UI
